2024

Award/Achievements

Wunderkind
2022

PROFESSIONAL OVERVIEW

Experienced in building interactive Power BI dashboards using DAX and Power Query to delivery real-time insights and improve decision – making. Skilled in developing automation solutions with Python, Power Automate, and Excel to eliminate repetitive tasks and reduce manual effort. Focused on creating efficient, data-driven solutions that streamline reporting and operational workflows.

EXPERIENCE SUMMARY

- 4 years of extensive experience BI developer having multiple skill sets and extensive working experience with Excel and Share Point files.
- Good Knowledge on working with SQL server.
- Interact with clients to discuss the business functionality and gather the requirements.
- Experience in transforming the data using Power Query like Replace Values, Split Columns, Merge Columns, Pivot, Unpivot, Append Queries, Merge Queries and Conditional Columns.
- Formed various measures and calculated columns utilizing DAX in Power BI to answer business questions. Performed time series analysis using DAX expressions in Power BI.
- Ability to adapt to new environments quickly, strong team player, enthusiastic learner, confident

WORK EXPERIENCE

Wipro | 06/2021 – Present

Project - 1: Designed a Power BI solution to track RFQs and monitor live case statuses by integrating Excel data and Salesforce URLs. Developed an interactive Power BI Report integrating Excel and Salesforce to track key metrics and automate reporting.

Project - 2: Built an automated system to clean, update, and integrate web-exported data into 21 Excel files, which were linked to Power BI for real-time reporting

Project - 3: Built Supply Chain Solution Reports using Power Query, reducing manual data processing time from 3 hours to 30 minutes.

Responsibilities:

- Responsible for defining the scope of the project, gathering business requirements, doing analysis and documents.
- Importing the data from data sources and preparing the data as per user requirement.
- Created clickable links for direct access to Salesforce cases and implemented dynamic filtering with DAX to enable drill-down capabilities.
- Created dynamic Power BI dashboards with DAX and slicers for real-time reporting, reducing daily reporting time by 45 minutes and enhancing decision – making
- Configured scheduled data refreshes in Power BI Service to ensure dashboards always reflect latest data and improving reporting accuracy.
- Restricted data for users using Row-Level security.
