Experience

Capgemini

November 2021 – Present

Software Engineer | Senior NetSuite Technical developer

Bengaluru, India

Designed and developed custom NetSuite solutions using **SuiteScript**, **SuiteFlow**, and **SuiteTalk**, **SuiteBuilder**, **SuiteBundle**, **Saved Search** to automate critical business processes and improve operational efficiency.

Collaborated with cross-functional teams to **gather business requirements**, **develop technical specifications**, **unit testing**, **integrations** between NetSuite and other business systems.

Understanding of Business Processes and having sufficient knowledge about **Procure to Pay**, **Order Management** and **inventory Management**.

Successfully **integrated SFTP** (Secure File Transfer Protocol) for **data migration**, effectively retrieving and transferring files, including those larger than **100MB**.

Managed governance in scripts, implemented **user validation**, and enhanced a file-reading script by **eliminating hardcoded data** and created **robust error handling** mechanism.

Collaboratively worked with the **Boomi team** and **external partners** to integrate NetSuite with **Snowflake**, **admin tools**, and **Arena**.

Designed and implemented **email templates** and **advanced PDF/HTML templates** to improve the organization's communication and document generation processes.

Worked on multiple **Capability initiatives** to enhance and improve overall functioning of NetSuite Practice.
